Commenting on the results, David Kershaw the Chief Executive said:

“We are pleased to report that M&C Saatchi saw a strong start to 2008 as we saw a good performance from both our organic and acquired businesses. There is no doubt the economic environment is increasingly challenging and we have felt the effects of this in the US and our Spanish business. Despite this, our global network remains strong and we have continued to win new business across our divisions. The outlook for the full year remains in line with management expectations.

At this time the uncertain economic environment leads us to be cautious about medium term visibility. However our balance sheet remains strong and we will continue to invest in markets which we believe will position us well for growth in the long term.”

Summary of results

We are pleased to report a strong set of results for the first six months of 2008 which saw revenue growth of 39% to £51.8m (2007: £37.3m). Like for like revenue growth which excludes the impact of exchange rate movements, acquisitions and discontinued operations increased by 18.7% to £43.1m. Clear Ideas, acquired in July 2007, contributed a further £6.1m. Revenue from operations closed in Singapore and Thailand during the period was £0.6m, and the balance of £2.0m resulted from currency gains.

Headline operating profit has increased by 174% to £7.7m (2007: £2.8m). Organic growth contributed £3.0m of the increase (an increase of 107%), Clear delivered a further £1.7m and the balance £0.2m came from exchange. The operating margin saw a substantial increase from 7.6% in 2007 to 14.9% this period. The increase comes from the improved performance of the Asia Pacific region, the continued growth of the Paris office and the contribution from Clear.

The Group's share of profit after tax from its associates decreased from a contribution of £71k in 2007 to a loss of £100k in 2008. This is due in part to a change in the accounting treatment for Play, our UK based digital operation and in part to the disappointing performance of our Spanish associate, Zapping/M&C Saatchi.

The headline net interest earned has decreased to £0.3m (2007: £1.0m). The decrease is due to the interest which is now being paid on the Group debt which stood at £7.5m at the end of the period (2007: nil).

The profit after tax attributable to the Group's minorities reduced from £0.8m in 2007 to £0.3m this year. This is principally due to the acquisition of the minority in Walker Media. 19.5% of the remaining 25% minority in Walker Media was acquired in July 2007 and a further 5.5% in April 2008 taking the Group's holding to 100%.

In May M&C Saatchi acquired the majority of digital advertising agency Play and from this point its results are fully consolidated (January to April 2008 profit £0.0m).

The headline profit attributable to the equity shareholders of the Group increased by 172% to £5.1m.

Headline basic EPS has grown by 147% to 8.62p (2007: 3.50p). The group issued 6.7m new shares to satisfy the acquisitions of Clear and Walker Media. The number of shares in issue at the end of the period was 60.3m and the weighted average for the period was 59.1m (2007: 53.6m) a dilution of 10.3%.

As at the 30th June we estimated that a further 1.4m shares could be issued to satisfy obligations under the Group's long term incentive plans and a further 3.0m shares may be issued as a result of earn out commitments. The diluted EPS for the period is therefore 8.02 p (2007: 3.45p)

Review of operations

Overview

During the first six months of 2008 we have seen strong performances from the majority of our operating divisions which have seen robust revenue growth and improvements in operating margins. Clear, the brand consulting business acquired in July 2007, has continued its good progress making a significant contribution to group earnings for the period. As anticipated, trading remained difficult in the USA since the second half of 2007 as a result of increasingly difficult market conditions. As reported the performance of our Spanish associate Zapping/M&C Saatchi has been disappointing, largely as a result of the well documented decline in Spain's economic conditions and there are no obvious signs of immediate improvement.

In March we reported that our loss making operations in Singapore and Thailand were under review. As a result we took the decision to close these offices, the combined cost of the closure process has been £0.6m in this period.

Review by Region

UK

The UK businesses all enjoyed an excellent first six months to the year. The like for like (excluding acquisitions) revenues and operating profit have increased by 14.4% to £25.2m and by 45.0% to £4.5m respectively. The operating margin has improved to 19.7% (2007: 14.0%). Brand consulting business Clear was acquired in July 2007 and is making a contribution to the period for the first time. Clear has continued the progress of the previous year with revenues of £4.7m and operating profits of £1.5m in the UK. Clear also has offices in Amsterdam and New York. The combined revenues and operating profit from Clear for the period were £6.1m and £1.7m respectively.

There has been good new business momentum across the UK businesses, the most important win being the government's anti obesity campaign. Other important wins have been East Midland trains and Hyundai.

Europe

We continue to see good growth in Europe. The like for like revenue has increased to £4.1m (2007: £2.1m) and operating profit has increased to £0.6m (2007: £0.0m). The operating margin has grown significantly to 12.9% (2007: 2.3%). Clear's Amsterdam office had a good first half with revenues of £0.8m, an operating profit of £0.1m and a margin of 15.5%.

The growth is being driven by the continuing success of the Paris office. Key to this period's growth was the excellent new business wins of Pages Jaunes and Jameson (Pernod Ricard) in the second half of 2007. This year the business has been moving forward by consolidating those account wins and extending the business into corporate PR and building their digital capabilities.

The Berlin office has also had a good first half benefiting from business won last year. Important wins were additional brands from Ferrero and the Green Party of Germany.

As highlighted in the overview, the performance of Zapping/M&C Saatchi has been disappointing in line with the Spanish economy. The net contribution to profit after tax has been a negative £0.1m, below management expectations. We had previously reported that we would increase our investment in Zapping from the current 24% to 51% from July this year; however as a result of the subdued market we have mutually agreed to put those plans on hold for the near future.

Asia and Australia

Revenue grew 30.8% to £14.8m (2007: £11.3m) reflecting both strong underlying organic growth as well as the impact of the stronger Australian and Asian currencies which have strengthened approx 12% between the periods. The like for like revenue (having stripped out the effect of exchange and the closure of the Thailand and Singapore office) increased by 20.6% to £14.2m. The notable driver of the revenue growth has been the continued recovery of the Australian business following the loss of the IAG account at the end of 2006. Significant new business was won during the second half of 2007 and the business has continued to be very active on current clients through the first six months of 2008. While anticipated, it was a disappointment to lose the Australian Tourism business after the 3 year statutory review and a change of government. This loss will impact the fourth quarter.

The rest of the region contributed an overall revenue increase of 20% with our office in Malaysia leading the way.

The operating profit for the region improved from the loss of £0.4m reported in 2007 to a profit of £0.9m at a margin of 6.2% (2007: negative). As already reported our offices in Thailand and Singapore have now been closed resulting in a cost of £0.6m. Removing the impact of this loss the operating margin was 10.3%.

America

Revenue increased by £0.2m to £2.1m (2007: 1.9m) and the operating profit increased £0.2m to £0.3m (2007: £0.1m). On a like for like basis, after removing the impact of closing the New York office in April 2007 and the contribution from Clear the office in LA reported a revenue decline of 7% to £1.5m and an operating profit of decline of 46% to £0.2m.

As reported in March the LA office started to feel the effects of the economic slowdown in the fourth quarter of 2007 as major clients began to reduce activity and cut their spending. Conditions continue to be challenging and to date we have seen no significant signs of improvement.

Outlook

These results show that the Group is in good shape. We have enjoyed a period of strong organic growth and our investments in new markets and new businesses have added to the potential and the diversity of the Group.

The economic environment is increasingly challenging and we have felt the effects of this in the US and our Spanish business. Despite this, our global network remains strong and we have continued to win new business across our divisions. The outlook for the full year remains in line with management expectations. At this time the uncertain economic environment leads us to be cautious about medium term visibility. However our balance sheet remains strong and we will continue to invest in markets which we believe will position us well for growth in the long term.”

7. TAXATION

Income tax expenses are recognised based on management's best estimate of the average annual income tax expected for the full financial year.

The estimated effective annual tax rate for the period to 30 June 2008 is 32.7% (30 June 2007: 36.5%).

The headline average annual tax rate used for the period to 30 June 2008 is 32.1% (30 June 2007: 31.6%).

The increase in the headline average annual tax rate is mainly due to closing offices reporting losses with no associated tax credits, partly offset by the reduction in the UK Corporation taxation rate, applicable from April 2008, from 30% to 28%.

The difference between the headline and statutory tax rates is caused by a difference in the profit before tax as neither the impact of fair value adjustments to minority shareholder put option liabilities or amortisation of intangible assets has any effect on the tax charge.
